

Integrate the stars across the curriculum into your classroom

(for low cost or free)

There are many software programs and apps to help you bring the night sky into your classroom, but here are some of the best at the lowest cost:

1. To see the constellations and deep sky objects in your classroom:

Free planetarium software: Stellarium (for Windows and Mac)

2. View the planets and their moons: A great app!! - Solar Walk 2 – for IOS - \$1.99

For teachers/students when you go outside at night

1. Sky Safari 5 - for ISO - It rocks the night sky - \$2.99

Solar Eclipse info

Three videos to help teachers get ready for upcoming eclipse – also links to lesson materials. Make sure to view video #3 for several student or teacher made materials for indirect viewing of the sun!

Go to TSIN.ORG and click on the Eclipse link

Are you in the path of totality – if so, here is an app that will help describe for you what you are seeing

Solar Eclipse Timer - \$1.99
